WarmFörm Joining Plates ea: (you use one per Element)	1.00
WarmFörm Foam Spikes box of 250: (you use 1 spike/4sqft of center foam)	37.50

Stone Drainage Base is provided by others. Note recommended spec for Base is as follows:

- Main base layer equal to a washed, evenly graded mixture of crushed stone or gravel, 100% passing 1 1/2" sieve, no more than 5% passing No.4 sieve.
- 2" topping layer equal to a washed, evenly graded mixture of crushed stone or gravel, 100% passing 3/4" sieve, no more than 5% passing No.4 sieve.
- Setting strip under the perimeter elements of a 1/4" crushed washed stone, thickness as necessary to adjust perimeter elements to level.

Review this with your stone supplier. Stone base must meet common practice for Frost Resistant Fill.
